Version history The first version of AutoCAD was released as a software-only system to users of the Architectural Desktop 1.0 release in 1985. The first AutoCAD for Windows product (AutoCAD LT) was released as a beta in 1987. The first major release of AutoCAD was AutoCAD 2.0, and it came with a new user interface, new style commands, and new CAD functions. In 1990, AutoCAD 3.0 was released with a new program structure, new, faster drawing algorithms, improved display performance, and a new programming interface. In 1993, AutoCAD 4.0 came with 3D drawing capabilities, new 3D commands, better component sizing and layout, and a new interface. In 1994, AutoCAD 5.0 and AutoCAD for Windows 95 were released. AutoCAD 5.0 features a completely new program structure, new object-based model and drawing commands, and much improved editing and drawing performance. AutoCAD 6.0, released in 1996, also came with a completely new programming interface and CAD functions, added feature-rich 3D capabilities, and improved performance. In 1997, AutoCAD 7.0 came with new abilities in office automation, improved drawing performance, and a new interface. AutoCAD 8.0, released in 1999, brought features such as improved paper handling and enhanced parametric capabilities, but was still a rather feature-light product. AutoCAD 9.0, released in 2000, brought many new 3D-capable features, and introduced the Dynamic Input panel. AutoCAD XML Enables the user to create, edit, and save their own XML-based files.
