Hello, we are currently developing PhotoWhirl to make it even better, and we are looking for people to help us in this process. Currently the app is based on the Xamarin platform, and is available on Windows, Android and IOS. We have recently completed an update that makes the program run on tablets as well, this change was not made by the developer. We are looking for a developer to create an update for the tablet version that allows the program to scale to any device with the correct resolution. As a side note, this update is something we hope to release in the next few months. For this reason, we are not looking for any developers right now, but if you have any questions please reach out to our email at support@photowhirl.com If you want to learn more about the platform, please visit our website at www.photowhirl.com or reach out to us at support@photowhirl.
