Convert Multiple Text Files To PDF Files Software Crack+ Full Version Free Download [32|64bit]

Convert Multiple Text Files To PDF Files is a simple application designed to generate PDF documents from plain text documents in batch mode, as the name says. It doesn't need Adobe Acrobat. Simple setup and interface

Setting it up takes minimal time and effort, since there are no special options, mandatory software products, or third-party offers involved. However, although this isn't mentioned anywhere, the app installs a PDF printer. When it comes to the interface, it adopts a normal window with a clean and intuitive structure, where it's possible to add as many text documents as you want to the task list, thanks to the fact that batch processing is supported. Sample files are available. Apart from specifying the preferred saving directory for the new PDFs, you can set a delay time between file conversions (seconds), in order to favor either job speed or system resources usage. Conversions don't take long, at the end of which Convert Multiple Text Files To PDF Files shows a notification message.

Afterward, you can open the new PDF docs to inspect results. Evaluation and conclusion It didn't put a strain on the computer's performance in our tests. No error dialogs popped up and it didn't hang or crash. On the other hand, it took a longer time than we expected to convert files, although the delay time between conversions was set to minimum.
