- Professional Template Pack - French U3
- Professional Template Pack - French U2

Software:

- OpenOffice.org
- LessQ: Kolmogorov-Smirnov Test for my data

I am wondering whether a Kolmogorov-Smirnov test can be applied to the data set from the attached picture or not. I've got the data for my research, and I am just looking for something that can check the normality of my data. Any comments will be appreciated!!

A: Applying statistical tests on your data is almost useless. The sample size is too low to have any useful results. If you are also making a point in your research about those data being non-normal, then I have some concerns about your research. (It is strange that you should publish your research without comparing how your data compares to a "reference" data set of normally distributed data for comparison. If you have analysed how your data compares to this reference data set, then this is a different matter.)

A: You should compare your data to a reference data set. You would like your data to be similar to the reference data. This test will return a p-value. The smaller it is, the larger your probability that the data is drawn from the reference data. Values of p

What's New In?

Professional Template Pack - French is a collection of useful French templates that ensure your resulted documents will be noticed and read. - School and University relevant templates

Keep an overview over your personal and mortgage expenses with the spreadsheet templates

Requirements:

- OpenOffice.org

Most recent comments from Professional Template Pack - French:

Your comment on Professional Template Pack - French Nov 02, 2011 Alec Barrie Hi all, I've been using some of the templates on this list for a while now - thanks for an excellent resource! Since a few weeks back I've converted my templates from Microsoft Word to Open Office, and I'm loving it! OpenOffice.org is very versatile, but the traditional feel of a microsoft template can be lost if you're not careful. If you don't know how to start up a template there are plenty of good tutorials out there. Your website is also very very slow, and downloading the whole of the templates is really annoying, perhaps you should consider selling these professionally. I'm by no means a professional - but I think the templates are excellent and well designed, and are perfect for beginners or intermediate users.
