Third-party utilities AutoCAD supports a number of third-party utilities, including: CAD Reader AutoCAD has had CAD Reader and then Autodesk Rendering Tools available since CAD 2000, and CAD 2008 introduced features similar to Photoshop including layer masks. The results of these utilities can be used as textures for BIM 360 (2009) in AutoCAD 2010. However, the native 3D tools and functionality of AutoCAD 2010 are more advanced than the 2D tools available in Autodesk Rendering Tools or CAD Reader. In addition, the 3D tools of AutoCAD 2010 have been redesigned and enhanced to be more intuitive and easier to use. AutoCAD 2009's The Drawing Experience (TED) now supports a file format called WYSIWYG (What You See Is What You Get). AutoCAD 2010 introduced a new user interface called AutoCAD 3D, which has many innovative features that make working with 3D easier than ever. It includes a new user interface, a 3D modeling environment, parametric modeling, 3D printing, a variety of new tools and more. With 2014 version of AutoCAD introduced "parametric modeling" with "BRepZ" feature, it has a own "BRep API". The "BRep API" was added to the "Mechanical" category of the "Web API" in AutoCAD LT 2014 AutoCAD 3D was also upgraded to 3D construction of architectural, engineering, and mechanical models, and the 3D surface is now placed on the coordinates as you build. This is the first 3D application on the market that supports full parametric modeling of parts, objects, and assemblies with textures, including 2D drawings or CAD data from other applications, such as AutoCAD, AutoCAD LT, BIM 360, Revit, etc. AutoCAD 3D's parametric models can be edited with the same 3D drawing tools as other AutoCAD 3D models. The BRep API adds a powerful new dimension to 3D modeling and drafting, empowering you to create parametric models of engineering drawings and AutoCAD LT.dwg files. With the BRep API you can create parametric models of engineering drawings and AutoCAD LT.dwg files.
