I like most of your stuff. I have now bought the 'All American Bits' DLC and on to the Baldwin loco's. Having driven my locomotive across the USA I can tell you they are pretty cool. I think I will make it to Colorado too. Just in case it does rain. We will be releasing the track in Steam Workshop as well as adding Steam Trading Cards and Achievements. In-game achievements are automatically awarded for the above. The track will be included in the free 'Pennsylvania Railroad' DLC. We will also be releasing 4 new scenarios to go with the Horseshoe curve, due for release in a couple of weeks time. Right now we are focusing on finishing the DLC, but we will be going back to 'Pennsylvania Railroad' as a second project. Ive been looking at this loco for a while and was having a look on your website to see if it was still possible to purchase but i cannot find it anywhere The i agree with you and i have the same problem but if i remember right you can get the new versions on steam if you are willing to wait a couple of days. Its sad i could not find an option to get it from steam but i did found a link where you can still buy them you might want to have a look at it. Thanks for your help. Its very much appreciated. I only discovered this over the weekend when I googled it. I didnt realise I could purchase and download a version from steam. Its not enough to wait for 2 days to purchase it. They keep killing it. I tried twice but it would only let me buy a key once for 6 hours. then it would reset and I would have to start again. It's just frustrating. This is the first Steam Train game I've bought in a while. I really wanted to get this as I was obsessed with this locomotive. I did however, get the rest of the superheros on Steam and spent loads of my time on them. Steam Train has given me a lot of hours of enjoyment and its been a huge success so I would really like it to stick around, but if Steam Train has to be converted to Steam as it has been, then so be it. I just don't like the idea of having another version of it... but there's no way I can purchase the rest of the

**Review (UPDATED)** The Zaccaria Space Shuttle is the latest entry in the popular Zaccaria line of pinball tables. It was released in a Zaccarias Space Shuttle tribute set with Cosmic Comet and The New York New York. It was the first Zaccaria pinball to feature a variable shot tracker, much like that found on most Stern pinball tables. The Space Shuttle is not a typical Zaccaria, as this table is one of the first of Zaccaria's to feature 3D computer generated graphics. Some of the graphics may seem a little rough when you play it, but this is easily forgivable with such a captivating table. This is also one of the first pinball tables to feature moving parts and randomized rounds on each ball. The gameplay of the table is no exception either. You have your standard left click functions with different stages of shoot and acceleration. The acceleration stages are a cute touch on this table and are the same as Cosmic Comet's right click gameplay. When your ball is close enough, you can choose between two modes, "shooting" and "continuous firing". In "shooting", the ball stays at the top of the screen from left to right until your shot is released. This all takes place in 100% of the time it takes to release your shot, this means that the Space Shuttle can be a little tricky to play. While "continuous firing", lets your ball continue bouncing up and down the ramp until it hits a bonus. If this happens, the ball drops faster and the space shuttle moves higher on the ramp. If the bonus doesn't fall for a while, the space shuttle doesn't move up at all. As you can see, there isn't much gameplay difference between the modes, and they're even used very similarly. The best part about the gameplay is the 3D graphics. Everything from the moving parts to objects, the cue, the playfield, its all done correctly. Every "graphics" object has a vibrant visual impact and add to the creativity of the table. It doesn't hurt that the table sounds awesome either. Even with the blurry graphics, you can still appreciate how much Zaccaria worked into this table. The audio in this table is very variable as well, its very difficult to tell what you're hearing and what you're
