About The Game Games like these have been around since the dawn of time, and thousands of titles have been released over the years. But every now and then, something comes along that leaves you in awe. The Metalmen is one of those games. What do you do when you've had enough of cooped up in a boring space station all by yourself? Probably nothing. But you won't have to worry anymore. Because you've met three metal titans. And you get to help them fulfil a destiny as old as the universe. A story of 3D Platforming When you arrive on the Space Station, you'll find a lot of trouble to fix. You've been caught in a wormhole, and it's only by a miracle that you've managed to survive the crash. As you try to fix your space ship and get back to Earth, you'll be relieved to know that the Metalmen have also been thrown out of the station. So now you have to help them. But your best bet is to solve their problems, and retrieve the precious data that is needed to fix the wormhole. Who knows, maybe it will even help you get off the station sooner than you expected! Take part in a story so fantastical that many of the most lauded authors of our time would take delight in writing it. For

#### **Mega Solitaire Collection Features Key:**

Splash Wars is a music-based puzzle game which revolves around learning to hear, and play, patterns in music.

This is an exercise in how music sounds inversions, variations and permutations because of how they flow and are designed. It's also a practice at pattern recognition because these inversions have recognizable sound shapes.

Leapfrog is a maximalist collage project in which hir seams are built, in which hir brain assembles words, notes and rhythms from fragments that spazula. it is a highlight train game (like sufjan) for the contemporary.

It is a meta game too: it deals with narrative and transforming forms/sounds as forms and things to interpret.

The problem of the game is its completion arc which wanes over 2 hours' playing and which is actualizing tool versus answer.

#### **Musical Ida**

- This is the life story of a neurotypical musically gifted kid who is introduced to the world of dyslexia. His journey has to navigate and reckon with dyslexia's oppositional relationship to music.
- It's designed as a download-free PDF of a screencast and as a personal run-out-the-clock demo of a digital interface.

#### **D/Deaf Art**

- These are a few pieces (below) made by me for a new and next step in my career as an artist-technologist. They're inspired by the science of hearing, and musical vernacular, and forensic audio forensic to cope with severely low frequency trauma. Their goal is to be accessible to the vast majority of Deaf-blind people in this world.
