SiteVerify

URL Explorer: Reverse Lookup – Reversing IP addresses: Hosts and domains are shown with their associated IP addresses. The IP addresses are displayed along with a list of countries and cities. Individual addresses can be displayed as a list or in list boxes. If more than one IP address corresponds to an entry, a box is displayed to show each address. A feature has been added to export all addresses with a given IP address to a list file and to CSV. Ever worry about images that you upload to your website? SiteVerify will check whether these images are online and accessible. SiteVerify supports 3 image qualities: JPG, JPEG, PNG Maximum number of photos to check: 5 Cacheable: Yes Disabled: No Maximum file size to check: 2 MB No, it will not slow your site down: No Allows folder browsing: No Allows protected images: Yes SiteVerify verifies URLs: If you have a custom WordPress installation (version 2.8+), you can use the SiteVerify plugin to automatically scan your WordPress site for "404 Not Found" errors. Check the SiteVerify WordPress Plugin here: Get a free 30-day trial If the demo is not sufficient for your needs, we also offer a 30-day trial of SiteVerify. After your trial ends, your license will not be renewed. Try SiteVerify at no risk Try SiteVerify for free! We know that you have checked thousands of our competitor's sites and want to see the difference SiteVerify offers. Go ahead and try our tool on one of the thousands of sites you are tracking for free! SiteVerify is an intuitive application designed to test URL addresses for dead links and images that are not displayed. A color system to separate good from bad results Once a valid URL is inserted, the utility verifies the links and the images. Results are displayed in four different colors: blue (URLs are alive), red (links were found to be dead), green (images were valid), and black (entries that have not been visited). The color system is a really great way of quickly visually distinguishing between results, more-so since sites can contain hundreds of links. All results can be exported to text files (TXT or CSV), but users also have the option of discarding either failed or successful tests. This can be a great method of singling out problem links and images. Users can select either quick or thorough scans The application allows users to select the traverse depth. This option can be a real time-saver if one needs just a quick scan. The opposite is true, of course, and a thorough scan is possible, although setting the "Traverse depth" to higher

What's New in the SiteVerify?

SiteVerify is a well-designed utility that allows one to check the status of a single URL address or a range of them. Customization:

- Free internet plugin: Free internet plugin allows users to perform tests on their own websites.
- Upload methods: The user has the option to choose from a drop-down menu for the method that will be used to upload the files to the website, such as FTP, AutoFS, WebDAV, and SMB2
- Off-line access: Off-line access allows the user to view the result of the test without connecting to the server
- Website statistics: The site statistics panel helps the user to view important data regarding the scan, such as the number of pages tested, the number of things found, and a detailed report including information and images of the urls tested.
- Image and URL converter: An option that converts web page images to text for the user to browse
- Color coding: The application comes with a color-coding system that displays the results in four different colors: blue (good), red (dead), green (valid), and black (not visited).
- Search by domain name: Users can enter a domain name to test this domain. The results are displayed in the same color as the domain name.
- Report: Users can download the result of the scan as a file.
- View report by domain: Users can select the domain name they wish to test from the drop-down menu. The result is displayed as a file in the same format as the downloadable result files, but with a.html extension.
- Export to text: Users have the option of exporting the results in a text file (TXT or CSV) so they can view them later.
- Interactivity: The application has an interactive mode which allows the user to quickly check web pages with a single click by clicking the Quick Test button in the main page.
- Search option: The user can search for specific patterns from the search bar that has a special character search mode.

Supported languages:
