

WinCam is a great new program, developed specially for use in the classroom. This software lets you easily and quickly make screen-recording movies and slide shows. You can record what you are watching on your computer screen, or you can use your webcam to capture an image of a slide or board presentation, letting you show a movie of a lecture, class, or even a presentation. WinCAM can be the teacher's tool to create an easy-to-use, engaging software. You don't need to be a guru to get a good result with WinCAM -- you simply insert special effects, introduce narration, add text titles, and record your class. WinCAM comes with special effects and talk-over you can create professional videos without a video editor. Why? WinCAM's animation technique lets you insert "animation effects" in all layers in your movie, allowing you to play with the text, graphics, and pictures as you're recording your movie. And you can add narration to your movie simply by pressing the talk-over button on your keyboard. You can record your slideshow right away and load the result into a DVD Burner. This allows you to record a DVD or burn your slideshow on CD so you can put it on an e-mail or put it on a website. If you use Crossover Player to play PowerPoint files, you can also use WinCAM to record PowerPoint presentations. Trial Version limitations: □ 30 day trial WinCAM 2000 Trial Version Description: WinCAM is the leading screen-recording and editing software to create professional-looking movies, presentations and slideshows. This trial version of WinCAM 2000 allows you to view, edit, and save your movies. Applying special effects, graphic settings, and adding text titles or narration is easy. This new version comes with WinDraw which allows you to draw on your screen while you are recording in REAL TIME. WinCAM 2000 Special Edition Serial Key Features: □ 15 day trial - WinCAM, the best screen-recording and editing software - You can view, edit, and save your movies - No limit on the number of videos you can save - You can also perform different functions in each layer in your movie - Supports graphic, animation, and speech effects - Includes your choice of 3,000 background music tracks - Preview your movie on any computer monitor - Save it

WinCAM is an award winning screen capture / editing software for Windows Vista. WinCAM 2007 delivers rapid, intuitive screen capture and editing features designed for the professional. Transform your PC into a powerful video production tool with complete screen recording and editing tools. WinCAM 2007 gives you complete control over video capture from your desktop - capture what you want, capture when you want, capture it at the frame size you want, capture it at the frame rate you want, and capture it at the bit rate you want. Now record directly to video files or manipulate your recorded video into a wide variety of different video formats, including the industry standard AVI format. Main Features: Screen Recording Capture: Monitor all the action on your PC and capture it with WinCAM. It captures what you see on your screen, not just what you highlight. With WinCAM you can capture and then edit or watch the captured video on your screen. Freeze the action: Freeze what is playing on your PC screen in WinCAM and capture it, then play back those captured frames of action when you want to do editing. Add Moving Text to Captured Video: Add text to your recorded video to go along with your action. Now you can add a title, message or dramatic close caption to your captured video as part of your editing. Video Converter: Use the built-in Video Converter to convert videos from any media into the AVI format, MPEG, MOV or MPG, easily. Video Size and Frame Rate Options: Adjust the size and frame rate of video captured in WinCAM or preview it. You can also adjust the color depth of video you capture. Playback Video Files: Play back video files captured in WinCAM. Live Screen Preview: Preview captured video in real-time. Audio Recorder: Record audio with WinCAM. New, more powerful and faster 3D-graphics accelerated screen recording technology:

New and improved 3D-graphics accelerated screen recording technology: Capture the action on 3D-enabled Windows Vista PCs with real-time 3D video capture, including any system animations, to give you the chance to capture the action in 3D. Edit captured 3D video into 3D stereoscopic video. Create, edit and watch 3D stereoscopic videos. Natively capture 3D screen content with Real-time VX3300 3D-graphics Video Capture from aa67ecbc25

With WinCAM 2000 Special Edition, you can record and edit all the elements of your web-cam broadcast or streaming video as with any other audio, graphics, and video file. Powerful and easy to use, WinCAM 2000 is a great resource for your multimedia projects. WinCAM 2000 is a screen-recording and editing software that will record all screen activities, from the movement of the mouse to application processes and keyboard inputs to the execution of any program. Its innovative object-editing tools let you insert caption boxes, graphics, images, narration, background music, and sound effects in all different layers in the easiest way. Versatile frame-by-frame editing tools will help make your movie look clean and give it that professional-looking cut. Special Edition features an AVI codec with the WinCam video codec (a smaller AVI file size than any codec), slide-mode recording, SWF conversion, and full interactive features. This new version comes with WinDraw which allows you to draw on your screen while you are recording in REAL TIME. Limitations: □ 15 day trial
