Can anyone see anything wrong with this, or any suggestions on how to improve the performance? Here is the code I'm using: \$(" #auto\_submit").click(function() { // Load all records and apply table formatting to lists, etc.. function loadData() { \$.getJSON('../index.php?module=hook&action=get\_hook

I learned a lot about family dynamics, including how it can deteriorate as a result of family members' reactions to certain situations. In particular,
